

Image Quality Associate (Cardiac Sonographer)

JOB PERKS:

- Flexible Part Time Hours
- Business/Office Environment – No scanning/interaction with patients
- Exposure to wide variety of medical imaging and novel treatments

COMPANY BACKGROUND: Medical Metrics, Inc.(MMI) is a small, Houston-based company that specializes in providing medical imaging analysis in support of clinical trials for novel drugs and medical devices. MMI does not work directly with patients but instead receives a wide variety of imaging modalities from participating hospital sites. MMI then provides feedback on image quality to the hospital sites and performs quantitative and qualitative image analysis for research purposes.

DUTIES AND RESPONSIBILITIES: The Image Quality Associate utilizes their background as a certified cardiac sonographer to review image quality and provide image acquisition feedback to other imaging techs who are collecting images for the clinical trial so that the quality of future images may be improved. Image review will focus on the candidate's area of expertise and may also provide opportunities to learn new modalities. Additionally, the candidate will assist with confirming physicians' results during the analysis QC process and will assist with technical inquiries relating to echocardiography.

REQUIREMENTS:

- 1-10 years echocardiography experience in a hospital setting
- Associate degree and active certification: RDCS or RCS
- High level of attention to detail
- Strong written communication skills
- Computer literate with ability to sit at a workstation at MMI facility for extended period of time
- Ability to work independently and in a team environment with minimal supervision
- Familiarity with DICOM and PACS

STRONGLY PREFERRED:

- Familiarity with DigiView software [Digisonics, Houston TX]
- Work experience with multiple modalities
